Application Method

1. For smooth surface grind/roughen the surface.

2. Peel the backing sheet from the TacMark Pads

3. Place TacMark Pads on the surface.

4. Press down firmly until the Tacmark Pad is set to the surface.

Surface Preparation :

- The surface should be free of moisture, grease.
- Free from dust and loose dirt, or particulate matter .
- The TacMark Pads may be laid over easily on the most substrates in the same way as many other rubber or vinyl tiles.
- Dry lay the Pads to ensure they are in the correct place and lie flat on the substrate.
- Easy Removal and Replacement for Maintenance if Needed
